## Education

---

- **Student at Georgia State University** (August 2015 – Present)  
Undergraduate Major: Bachelor of Science in Computer Science
- **Student at GA Tech Coding Bootcamp** (January 2019 – Present)  
Full Stack Flex Program
  - *A part-time, 24-week course that provides the knowledge and skills to build dynamic end-to-end web applications and become a full stack web developer. The boot camp covers both theory and application development and allows for learning within real-world projects.*

## Projects

---

- Feeling Hungry – Web Developing** (March 2019)
- Recipe search application using Edamam Developer API and AJAX calls
  - Technologies used are HTML, CSS, UIKit CSS Framework, JavaScript, jQuery library, and Google Firebase.
  - Given a selection of ingredient buttons, the user can select items that they have pre-existing within their fridge.
  - If there is an ingredient that is not already listed, the user has the option to create their own custom buttons.
  - For those with allergies, there is a category where the user can omit specified ingredients from appearing in the recipe search.
  - Uses Google Firebase authentication to register new users, sign in, and log out.
